See also Manda dan Konsep Dosen Farmasi Category:Education in Indonesia Category:Education in West JavaIt is not uncommon for a retailer to provide an example of a particular product to the consumer. The retailer is motivated to do this because consumers, when shown an example of a product, tend to purchase that product. However, providing an example of a particular product to a consumer can be inconvenient, especially when the consumer can easily purchase the particular product at a nearby store, rather than at the retailer's location. Furthermore, even if a consumer is familiar with a product, and even if the consumer is willing to make the trip to the retailer's location to purchase the product, it can be inconvenient for the consumer to make note of all of the attributes of the product in order for the consumer to shop for the product at the retailer's location.East Ayrshire (UK Parliament constituency) East Ayrshire was a county constituency of the House of Commons of the Parliament of the United Kingdom (Westminster) from 1950 to 1983. Boundaries The County of Ayrshire. Members of Parliament Election results Elections in the 1950s Elections in the 1960s Elections in the 1970s References Category:Historic parliamentary constituencies in Scotland (Westminster) Category:Politics of East Ayrshire Category:Politics of Ayrshire Category:United Kingdom Parliamentary constituencies established in 1950 Category:United Kingdom Parliamentary constituencies disestablished in 1983Q: Numpy Quantile function has trouble in scaling by weight I'm trying to apply inverse probability weighting (IPW) to a classification task. I've been successful in estimating the weights so that some output is classified correctly, but when the weights are multiplied with the output, the values are too high. For instance, I have a sample of some data that looks like this target value 0 0 0.0933593976089814 1 1 0.1583005979806395 2 2 0.3643583459344444 3 3 0.2145404558 f678ea9f9e
