About This Content

High-speed Chinese rail services were first introduced in 2007 and operated with existing CRH (China Railways) rolling stock running on existing lines which had been upgraded for speeds of up to 250 km/h (160 mph) and on newer dedicated high-speed track rated up to 350 km/h (220 mph).

The CRH380D is the newest generation of Chinese high speed train, capable of running at 380km/h and one of the fastest production trains in the world. In service with China Railways these trains have been designated as CRH380D (8-car set) & CRH380DL (16-car set) using the new numbering system.

In September 2009, Bombardier announced an order for eighty Zefiro 380 high-speed trains by the Chinese Ministry of Railways (MOR) to be produced at Bombardier's joint venture Sifang (Qingdao) Transportation Ltd.

The CRH380D uses state-of-the-art flat-screen glass panels to display train information as well as the route speed and signal data from suitably equipped routes. It can be driven manually or by using the on-board computers which mean you need to do little more than adjust the cruise control to comply with the speed limits between your departure and destination stations.

The CRH380D has been developed for and interacts with the speed and signalling system included in the Chengdu – Suining High Speed Route, also available on Steam.

The CRH380D developed by Just Trains is also Quick Drive compatible, giving you the freedom to drive the CRH380D on any Quick Drive enabled route for Train Simulator, such as those available through Steam. Also included are scenarios specifically for the [Chengdu - Suining High Speed](#) route (available separately and required to play these scenarios).

Scenarios

Four scenarios are included for the Chengdu – Suining High Speed Route:

- Dawn Service
- Evening Rescue
- Morning Service
- Night Express

More scenarios are available on Steam Workshop online and in-game. Train Simulator's Steam Workshop scenarios are free and easy to download, adding many more hours of exciting gameplay. With scenarios being added daily, why don't you check it out now!

An old Fart. Crashes on exiting every time, have to hard boot to fix.
For a few bucks it's ok gameplay.. GAME WERST EVER REMOVE IT FROM STEAM. This game is sadly littered with bugs. Whilst the concept is factastic, the overall gameplay and execution is really poor.
The developers don't seem to be adding to the game in the near future and there are no bug fixes.. It was an okay game. Very quick and fairly simple. Especially for an old hand at hidden object games.
The graphics were pleasant if as simplistic as the game itself. The minigames weren't too bad. A bit easy but again, this isn't really a game for somebody needing a challenge.
I would recommend this game for when you wanted something mindless, pleasant and quiet... Like when you just needed not to think or had a head ache.
All in all, in less than the two and half hour achievement, I finished this just short of the last two achievements. It was a pleasant couple of hours spent... Not thrilling but definitely pleasant.. great game!. very good game plz play bc these people need money

THIS! IS! SPA---er, I mean, OLYMPUS!

Nice job, Alawar, The God/Goddess of Casual Games of Gamer's Childhoods.. Very fun take on mini golf!. This game is slow going, the units don't do what they are suppose to do in battles, I call this game an epic failure... DO NOT PLAY OR PURCHASE THIS GAME. simple and adventrest great game for half a buck. This game is fun! I love everything in this game: Light/Shadow Bears, maps, Shadows... Pretty enjoyable. ^_^
